Flea Treatment Prep Sheet

Prior to our technician's Arrival:

Please review & complete all the necessary preparations listed below. These steps will ensure that your Technician is able to provide an effective and safe treatment

Preparation Process

General

- Move small items from the floor and move large items close together in the room so the maximum area can be treated.
- Make as much of the floor space accessible by removing all small items from the floor. This includes the bottom of closets and under beds.
- Remove and clean or dispose of all pet bedding

Pets

- Birds and Pets must be removed from the premises for 4 hours.

Important Reminder

- You will need to vacate the Area.
- It is necessary for you or your pets to be out of your home during the treatment and to stay out for 4 hours after the treatment.

Upon Re-entry open the windows for 20 minutes to properly ventilate the treated room

After The Treatment:

The products applied will only be effective if the following steps are taken after your home is serviced Follow the Technician's recommendations for any repairs needed to close entry points.

- DO NOT use other pest control chemicals (powders or sprays) or cleaning products near areas that have been sprayed, as this will decrease or eliminate the effectiveness of the treatments.
- Upon re-entry to your home, do not wash any of the baseboards for a period of at least 2 weeks. The pesticide residual effects lessen by washing.
- You may put back all kitchen items after the re-entry time as advised by your technician.

Pest Management Enterprise

The California Department of Pesticide Regulation (CDPR) and the Structural Pest Control Board (SPCB) enforce state laws and regulations pertaining to pesticide use, sales, licensing, worker protection safety. All companies and workers must meet state regulations to conduct business within the structural pest control board. All chemicals purchased and used in the state of California must be regulated by CDPR and SPCB

Hoja de preparacion de tratamiento de pulgas

Processo de Preparacion

General:

- Mueva los artículos pequeños del piso y acerque los artículos grandes en la habitación para que se pueda tratar el área máxima.
- Haga que la mayor parte del espacio del piso sea accesible quitando todos los artículos pequeños del piso. Esto incluye la parte inferior de los armarios y debajo de las camas.
- Retire y limpie o deseche toda la ropa de la cama de las mascotas
- **Toda persona y mascota necesita salir del hogar durante y despues de 4 horas que el tratamiento lleve acabo.**

Después del tratamiento

- Los productos aplicados solo serán efectivos si se toman las siguientes medidas después de que se haya reparado su hogar:
- NO use otros productos químicos para el control de plagas (polvos o aerosoles) o productos de limpieza cerca de las áreas que han sido rociadas, ya que esto disminuirá o eliminará la efectividad de los tratamientos.
