PRIOR TO OUR TECHNICIAN'S ARRIVAL:

PLEASE REVIEW & COMPLETE ALL THE NECESSARY PREPARATIONS LISTED BELOW. THESE STEPS WILL ENSURE THAT YOUR TECHNICIAN IS ABLE TO PROVIDE AN EFFECTIVE AND SAFE TREATMENT

Preparation Process

General

- ❖ In all rooms: move all furniture at least 2 feet away from the wall, heaters and radiators so spray can be applied to baseboard perimeters

Kitchen

- No food should be exposed in all areas. Kitchen must be clean and food items are sealed in containers. Keep garbage and food to a minimum and throw out your garbage daily. Ensure dirty dishes are not left out overnight.

Bathroom

- Access to all plumbing lines under sinks is required; please have all items in cupboard below the sink cleared out.

Living Room

- Children's toys should be placed in plastic bags or placed in cupboards.

Storage Areas

- Linen, broom, and clothing storage closet floor areas must be cleared of all items. These items can be placed on the bed.

Pets

- Birds and Pets must be removed from the premises for 4 hours. Fish tanks and pumps must be covered, and the pumps turned off for 8 hours.

Only if Exterior of home is to be treated

Important Reminder You will need to vacate the Area.

- Vegetation should be 18 inches off the walls and tree branches should be three feet away. Also ensure the concrete foundation is exposed, no soil up against the siding. No timber or water-damaged items next to the home.
- GARDEN/DECK/BALCONY Move all planters, patio furniture etc 2 feet away from the walls of the home.
- **It is necessary for you or your pets to be out of your home during the treatment and to stay out for 4 hours after the treatment.**
- Anyone who has allergies, asthma, is pregnant, or under the age of 4 or with respiratory problems should consult their family doctor where they have concerns regarding the re-entry times.
- Upon re-entry, open the windows for 20 minutes to properly ventilate the treated room.

After the Treatment

Applicable Notes

ONLY IF SPRAY IS USED FOR INTERIOR: It is necessary for you or your pets to leave your home during the treatment and for 4 hours after the treatment. Upon re-entry, open the windows for 20 minutes to properly ventilate the treated rooms.

ONLY IF SPRAY IS USED FOR EXTERIOR: It is necessary for you to keep your windows and doors closed during the spray application outside. Stay away from the exterior perimeter of the building until the treatment is dry (2 hour).

The products applied will only be effective if the following steps are taken after your home is serviced:

- DO NOT use other pest control chemicals (powders or sprays) or cleaning products near areas that have been sprayed, as this will decrease or eliminate the effectiveness of the treatments.
- Upon re-entry to your home, do not wash any of the baseboards for a period of at least 2 weeks. The pesticide residual effects lessen by washing.
- Vacuum after treatment, especially along the baseboards.
- Wash off kitchen countertops, breadboard, refrigerator, and stove tops with soap and water.
- You may put back all kitchen items after the re-entry time as advised by your technician.
- Follow the Technician's recommendations for any repairs needed to close entry points.
